AUTHENTIC ACCESSORIES

Jeep®

**WE BUILT IT.
WE KNOW IT.**

MOPAR® IS ORIGINAL EQUIPMENT – DESIGNED BY THE SAME PEOPLE WHO MADE YOUR JEEP® BRAND VEHICLE.

NO ONE UNDERSTANDS THE ENTIRETY OF YOUR VEHICLE'S FUNCTIONALITY AND DESIGN LIKE WE DO.

+ OUR STANDARDS ARE SKY HIGH.

Factory original equipment must adhere to a strict standard of testing. Drive with confidence knowing your Mopar® Parts and Accessories have passed this rigorous testing.

+ WE ONLY USE THE GOOD STUFF.

We only use high-quality materials because we know that our parts and accessories will impact the appearance, durability and value of your vehicle for years to come.

+ WE HAVE IT. OTHERS DON'T.

Only Mopar has direct, exclusive access to your vehicle's specifications. This information allows us to use an integrated design approach to create precise-fitting parts and accessories.

+ WE DON'T DESIGN PARTS OR ACCESSORIES IN A VACUUM.

We consider the vehicle as a whole when engineering our components. Our parts are exclusively designed to complement your vehicle without compromising its aesthetic, functionality and performance.

+ EASY-AS-IT-CAN-BE INSTALLATION.

Installing aftermarket pieces often requires cutting/drilling into the vehicle body. Most Mopar Accessories use existing openings and weld nuts for secure installation. This makes the job easier, keeps rust and corrosion away and helps protect the structural integrity of your Jeep® Brand vehicle.

JEEP® PERFORMANCE PARTS ULTIMATE DANA44™ ADVANTEK® AXLE ASSEMBLY⁽¹⁾ (Not shown). Made in the U.S.A. and built strong for hard-core Jeep Wrangler off-roaders. High-strength features include AdvanTEK® Gear technology that reduces gearset packaging with more strength and durability, allowing for a condensed carrier and improving ground clearance. Chromoly 4340 axle shafts, thicker quarter-inch steel bracket mounts, thicker 9.5-mm tubes and upgraded 1410 U-Joints also increase trail durability. A nodular iron differential cover provides extra ribbing for strength and increases overall rigidity. The high-clearance carrier design adds an additional half-inch of ground clearance, and an expanded range of gear ratios (4.56, 4.88, 5.13 and 5.38) helps accommodate for a variety of tire sizes. The direct bolt-in axle assembly allows use of OEM components and provides virtual "plug and play." Includes electronic differential lockers already installed.

MAP OUT YOUR STRATEGY

ADDING BIGGER TIRES AND WHEELS TO YOUR JEEP® WRANGLER CAN REQUIRE ADDITIONAL MODIFICATIONS. BE SURE YOU UNDERSTAND HOW EQUIPMENT UPGRADES WILL AFFECT OTHER COMPONENTS AND CAREFULLY PLAN OUT YOUR BUILD.

ADDITIONAL ACCESSORY REQUIREMENTS: TAILGATE REINFORCEMENT SYSTEM, OVERSIZED SPARE TIRE MODIFICATION KIT AND CENTER HIGH-MOUNT STOP LIGHT (CHMSL) RELOCATION KIT (OPTIONAL)

1 LARGER TIRES

Whether you're in the mud or on the rocks, larger tires are designed to give you a better off-road experience.

2 OFF-ROAD WHEELS

Just like larger tires better connect to the terrain, off-road wheels help improve handling, acceleration, braking, traction and steering.

3 HIGHER FENDER FLARES

Allow you to upgrade to larger wheels and install Lift Kits without experiencing tire interference in the wheel well.

4 2-INCH LIFT KIT⁽¹⁾⁽²⁾

A Lift Kit gives additional clearance to help your Jeep® Wrangler better navigate off-road terrain and clear even more challenging obstacles.

⁽¹⁾ Jeep Performance Parts, including Lift Kits, are designated as "Off-Road Only" parts and have not been evaluated or tested for crashworthiness or compliance with safety standards. Jeep Performance Parts noted as "Off-Road Only" are aftermarket only and may not be installed by a Chrysler, Dodge, Jeep, Ram or FIAT retailer on a new vehicle, and may not be sold or financed in conjunction with the sale of a new vehicle.
