

TUTELA TRANSMISSION EPYX Cod. 1476

DESCRIPTION

Specific multi-grade lubricant for manual gearboxes and differential with hypoid gears of all the types of motor vehicles where lubricant with Extreme Pressure (E.P.) characteristics is demanded.

CHARACTERISTICS

- | Developed specifically to adapt itself to various operating conditions and environments.
- | Specific formulation ensures the correct balance between gear protection and gear changes in every season of the year.
- | An opportune balanced additive, at the same time, ensures good compatibility with the metals, alloys, seals inside the transmission and an optimal heat dispersion.
- | The aim of the viscosity is that it protects the gears in every condition of lubrication and every revs.
- | Its particular viscosity to warmth guarantees the reduction of mechanical noisiness of the gears in high temperatures.

In consideration of the high quality of the product, TUTELA EPYX can be used in the manual gearboxes of all automobiles.

ADVICE ON USE

Thanks to its specific viscosity TUTELA EPYX can be used in every season of the year.

TECHNICAL DATA

SAE 80W-90, API GL 4 PLUS
